◆ Land Development Plan

U.S. Postal Carrier Annex

As a partner of Steckbeck and Saxinger Engineering Associates, Michael Saxinger prepared the land development plans for the U.S. Postal Carrier Annex in Lancaster, Pennsylvania. He worked with the U.S. Postal Service to prepare a plan that met their needs. The small lot needed to accommodate large postal trucks as well as provide employee parking, postal truck parking and loading docks. Michael's creative design met the needs of the client and stayed within the parameters of local ordinances.
